SKILLS

- **Languages:** C++, Java, Python, JavaScript, TypeScript
- **Core CS:** DSA, OOP, DBMS, Operating Systems, Computer Networks
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs, WebSockets, JWT, OAuth 2.0
- **Databases:** MongoDB, MySQL, Prisma ORM, MongoDB Atlas
- **DevOps / Cloud:** AWS EC2, Vercel, Render, Firebase, Git, GitHub
- **Tools:** Postman, Figma, Visual Studio Code
- **Soft Skills:** Problem-solving, Team Player, Adaptability

PROJECTS

Prayas – Flood Prediction System | Live Demo | Github Jun '26

- Built an artificial intelligence prediction model that ingests multiple core data sources, including live weather APIs, digital elevation models, and historical records to accurately forecast flood-susceptible regions.
- Crafted an interactive React-based interface featuring a GIS map for real-time alerts, guided evacuation routing to verified safe shelters, and a transparent relief-fund dashboard.
- Validated the model's effectiveness by attaining 94% accuracy during historical back-testing.
- **Tech Stack:** Python, React, Firebase, JavaScript, REST APIs, GIS

Docit – AI Document Platform | Live Demo | Github Feb '26

- Architected an AI-powered document management platform with end-to-end workflows for upload, AI summarization, and document Q&A, validated across 50+ documents in 6+ file formats.
- Built real-time multi-user workspace chat using WebSockets, enabling instant collaboration within shared document sessions.
- Integrated Google OAuth 2.0, JWT authentication, refresh-token session handling, B2 cloud storage, Zapier-compatible webhooks, and user activity analytics into a production-ready deployment.
- **Tech Stack:** Next.js, TypeScript, Node.js, MongoDB, WebSockets, OAuth 2.0

TRAINING

Logic Building, Programming and Data Structures | Link Jun '25 – Jul '25

- Strengthened problem-solving through hands-on implementation of arrays, linked lists, stacks, queues, trees, graphs, and hash tables with time-space complexity analysis.
- Applied recursion, memoization, and algorithmic trade-off analysis to solve computational problems efficiently.
- Constructed a dynamic Grocery Management System offering real-time inventory tracking, low-stock warnings, fast product lookup, efficient cart flow, and a dual light/dark UI for improved experience.

CERTIFICATES

- Using Atlas Vector Search for RAG Applications | MongoDB | [Certificate](#) Jun '25
- Privacy and Security in Online Social Media | NPTEL | [Certificate](#) May '25
- C Programming Bootcamp | Udemy | [Certificate](#) Feb '24
- The Bits and Bytes of Computer Networking | Coursera | [Certificate](#) Sep '24
- Data Structures and Algorithm | iamneo | [Certificate](#) Dec '24

ACHIEVEMENTS

- Solved 200+ problems on LeetCode | [Link](#) Sep '25
- 3-Star Silver Rating (Java) | [HackerRank](#) Mar '25
- Code A Haunt Hackathon Participation | [Link](#) Feb '24

EDUCATION

- **LOVELY PROFESSIONAL UNIVERSITY** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.42** Aug '23 – Present
- **ARMY PUBLIC SCHOOL** Jalandhar, Punjab
Intermediate; **Percentage: 87%** Apr '22 – Mar '23
- **ARMY PUBLIC SCHOOL** Sagar, Madhya Pradesh
Matriculation; **Percentage: 95%** Apr '20 – Mar '21
